Barangay Blotter Management System

Page 1 — Program Start, Login & Validation

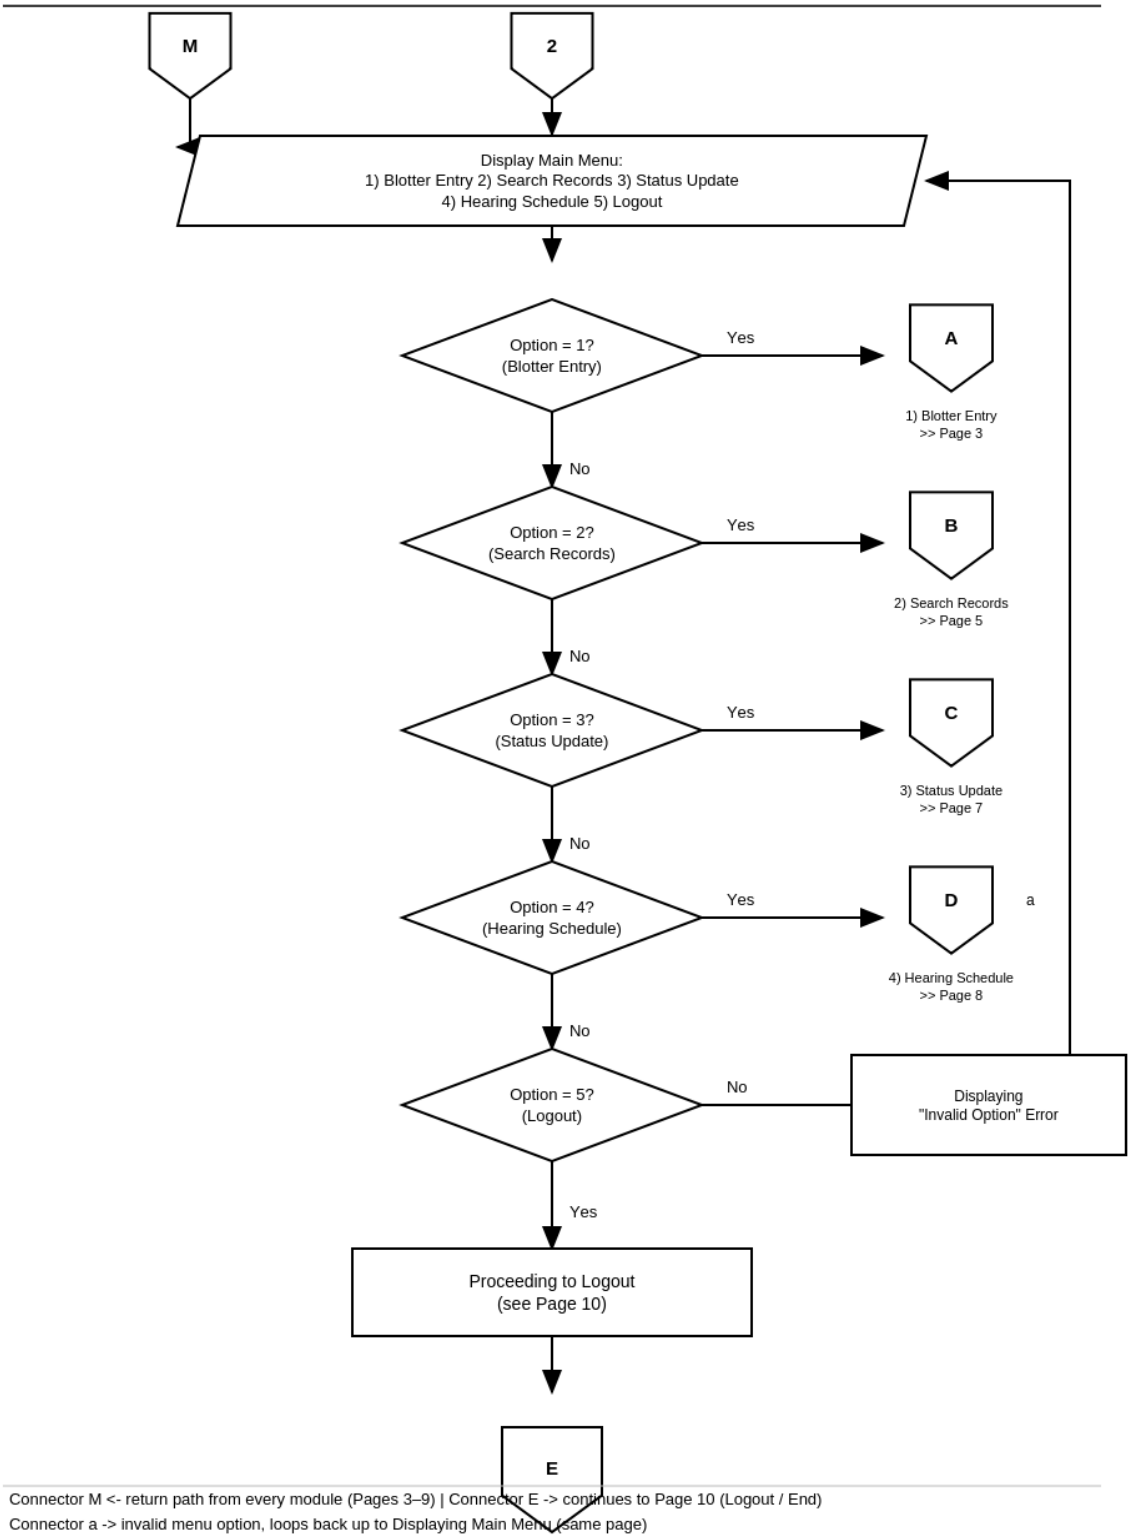

Connector 2 -> continues to Page 2 (Main Menu, after successful login)

On-Page Connector 'a' -> retries login: loops back to the Username/Password input on this same page (matching letters only — no line is drawn back across the page; see full legend on Page 10).

Barangay Blotter Management System

Page 2 — Main Menu (Module Selection)

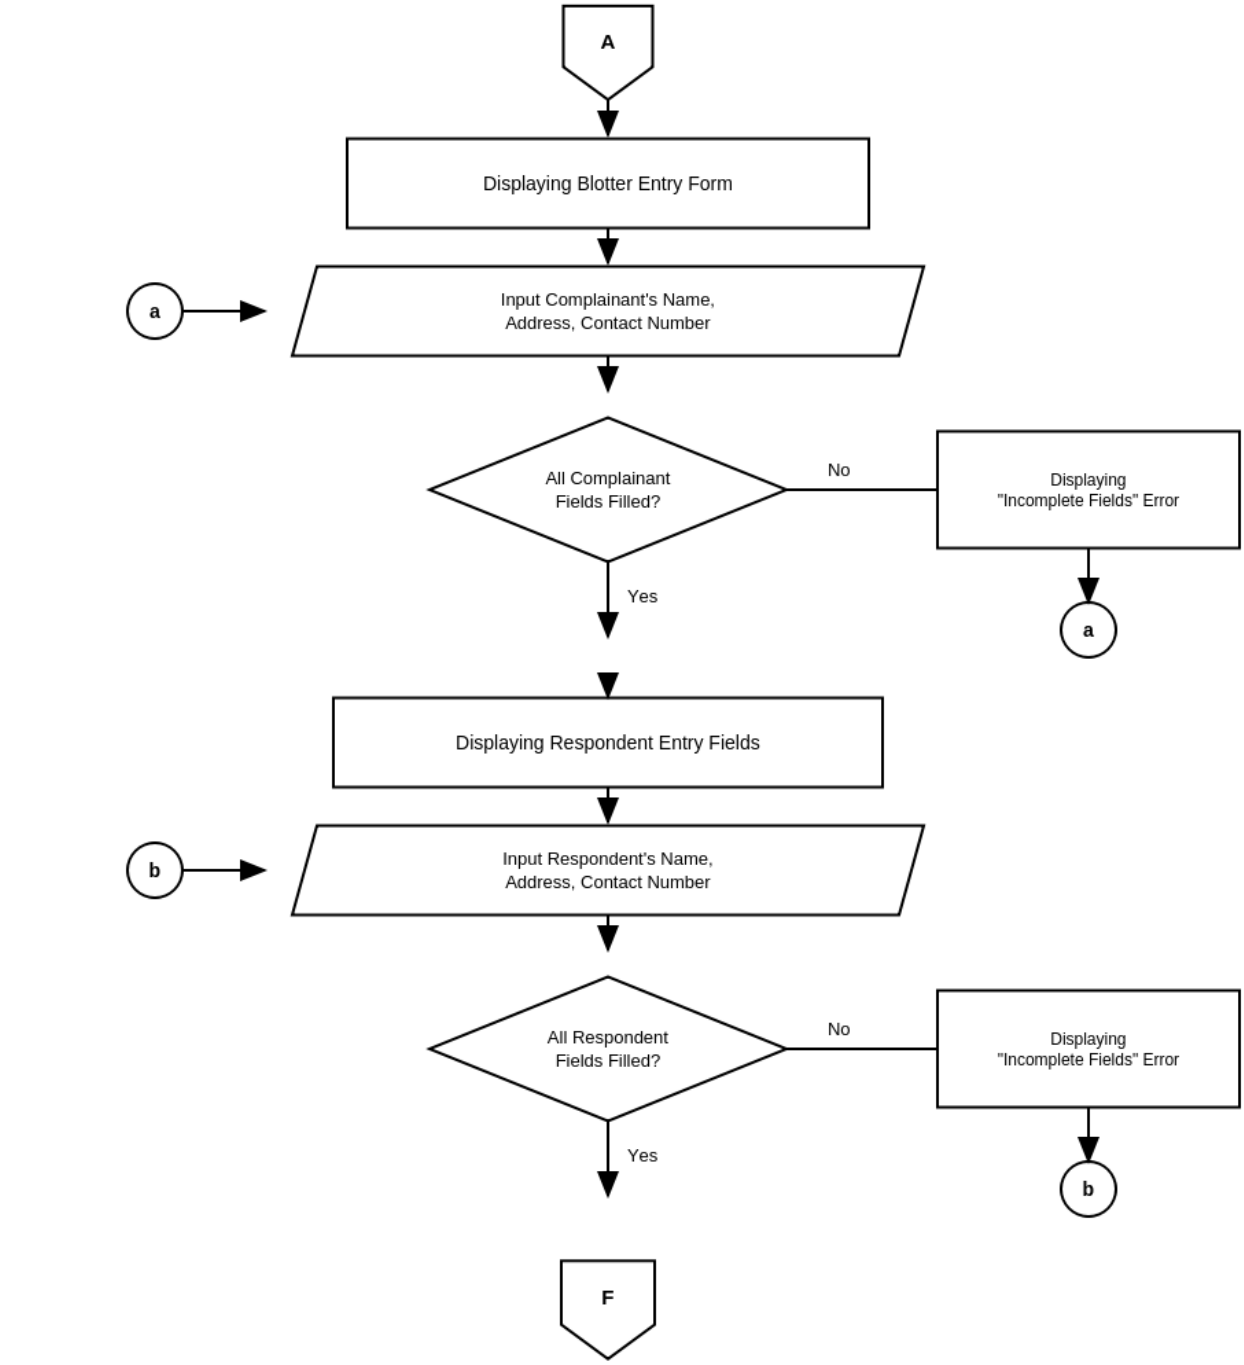

Connector M <- return path from every module (Pages 3–9) | Connector E -> continues to Page 10 (Logout / End)

Connector a -> invalid menu option, loops back up to Displaying Main Menu (same page)

Cascading Yes/No decisions (no single shape fans out to more than two arrows) keep every branch in its own lane — no crossing lines.

Module 1: Blotter Entry / Filing

Page 3 — Encoding Complainant & Respondent Information

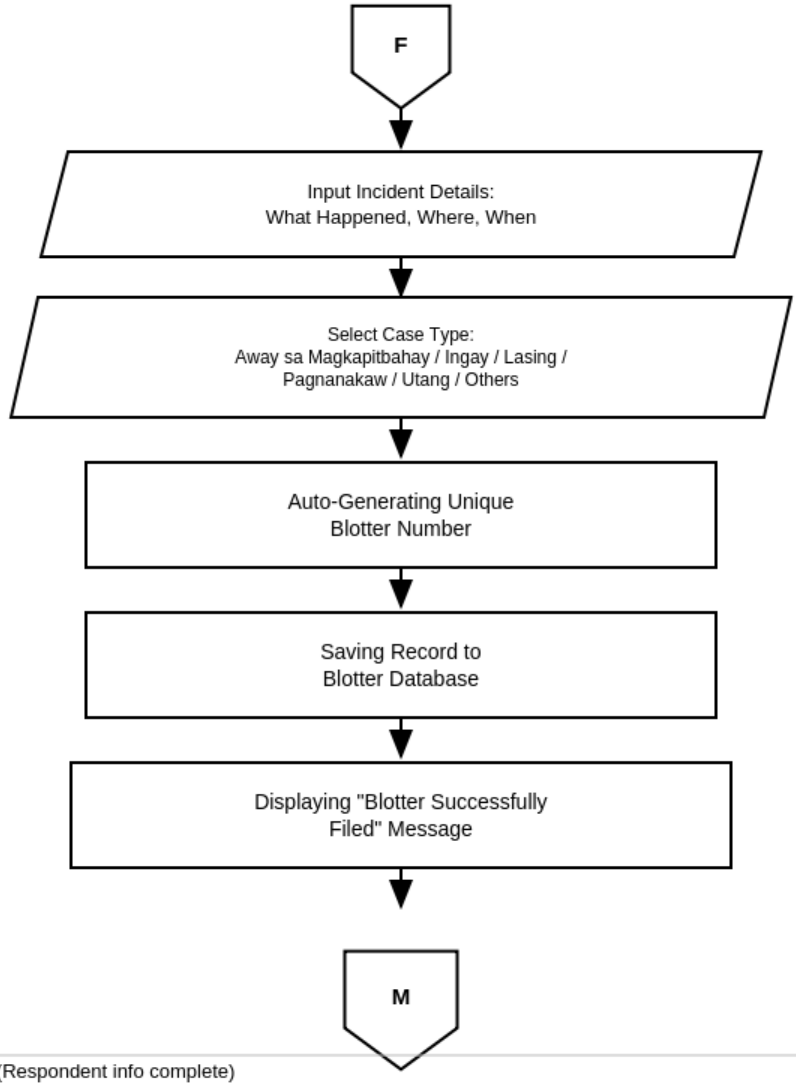

Connector A <- from Page 2 (Main Menu, option 1: Blotter Entry) | Connector F -> continues to Page 4 (Incident Details & Save)

On-Page Connector 'a' -> loops back to the Complainant input on this same page

On-Page Connector 'b' -> loops back to the Respondent input on this same page

Module 1: Blotter Entry / Filing

Page 4 — Incident Details, Case Classification & Save

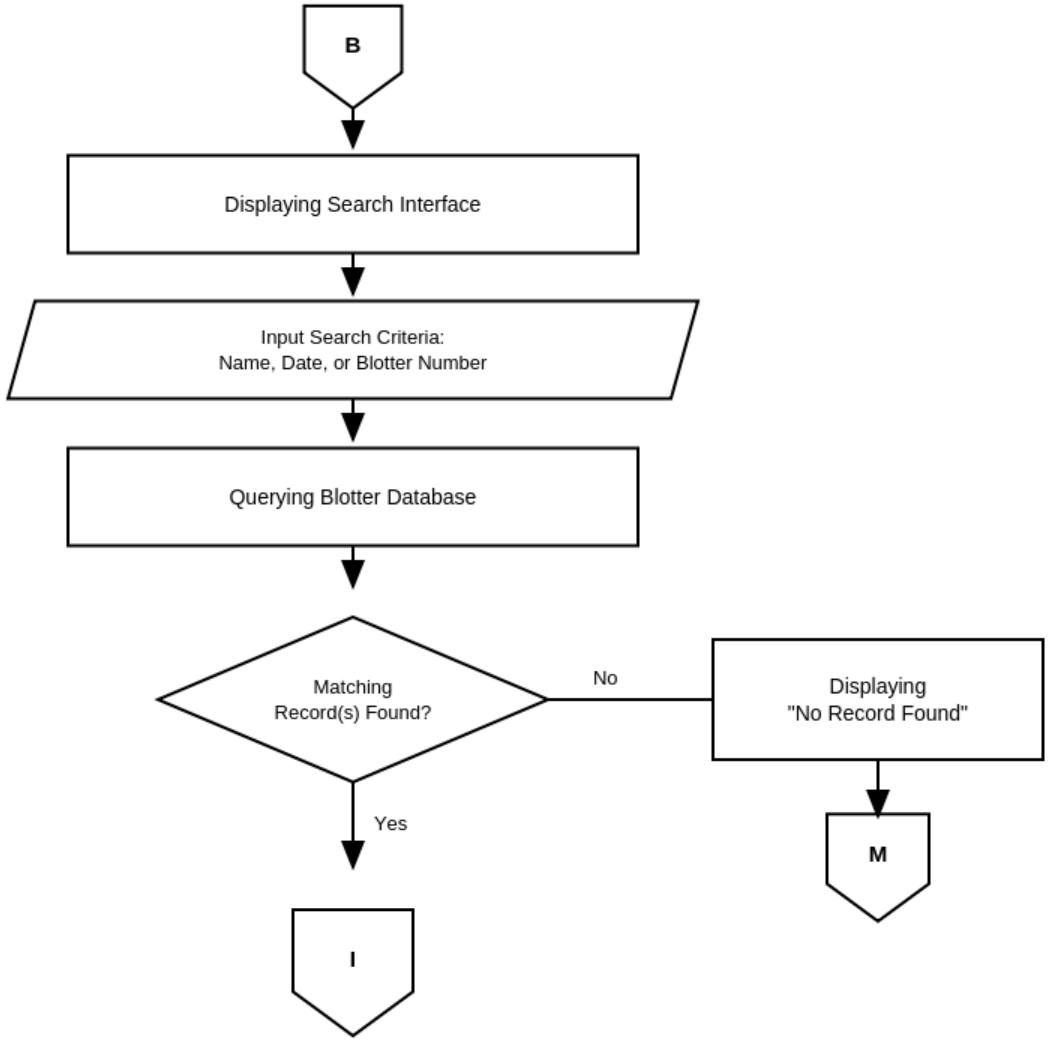

Connector F <- from Page 3 (Respondent info complete)

Connector M -> returns to Page 2 (Main Menu) — the standard return path used by every module.

Module 2: Search & View Records

Page 5 — Search Interface

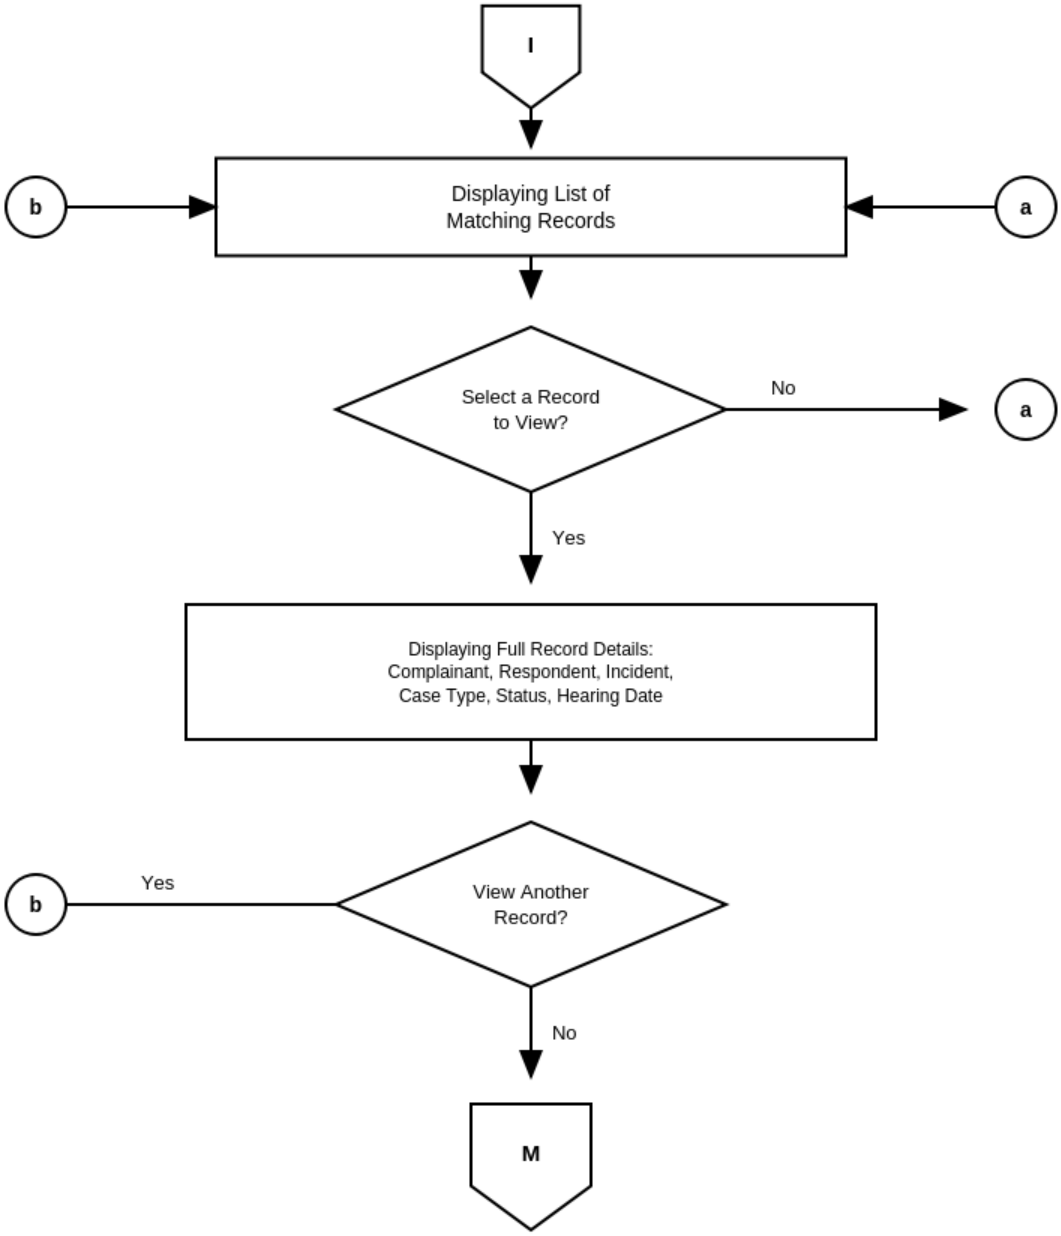

Connector B <- from Page 2 (Main Menu, option 2: Search & View Records)

Connector I -> continues to Page 6 (Display & View Record Details) | Connector M -> returns to Page 2 (Main Menu)

Module 2: Search & View Records

Page 6 — Displaying & Viewing Record Details

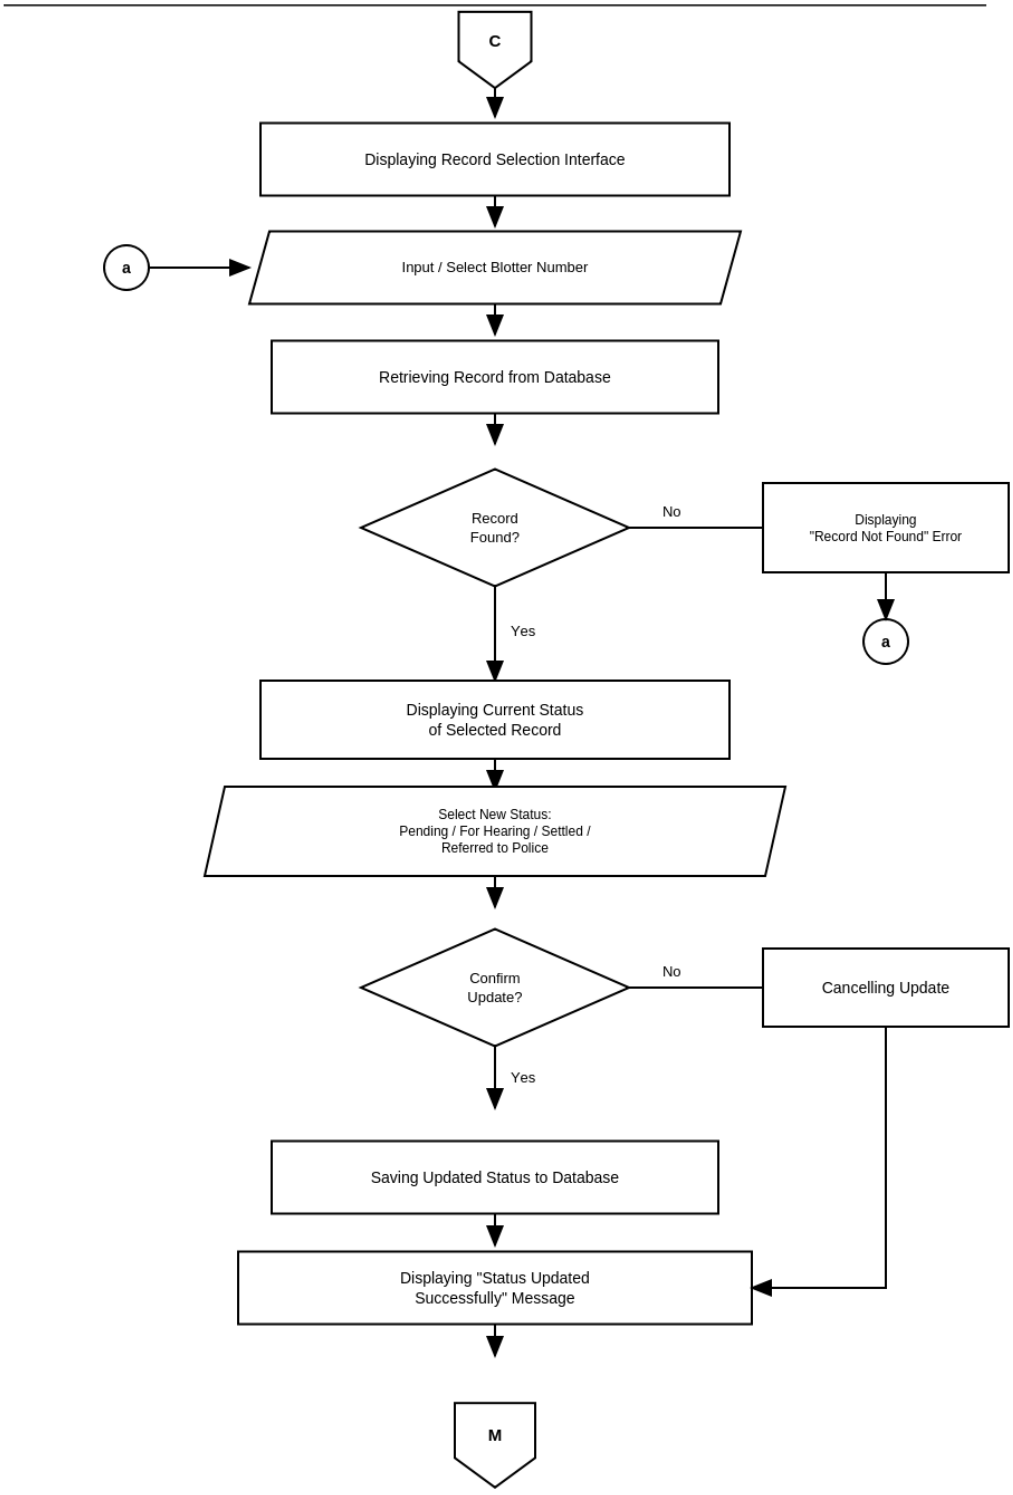

Connector I <- from Page 5 (Search results found) | Connector M -> returns to Page 2 (Main Menu)

On-Page Connectors 'a' & 'b' -> loop back to the Record List: matching letters only,

no line is drawn back across the page, so nothing overlaps the flow below it.

Module 3: Status Update

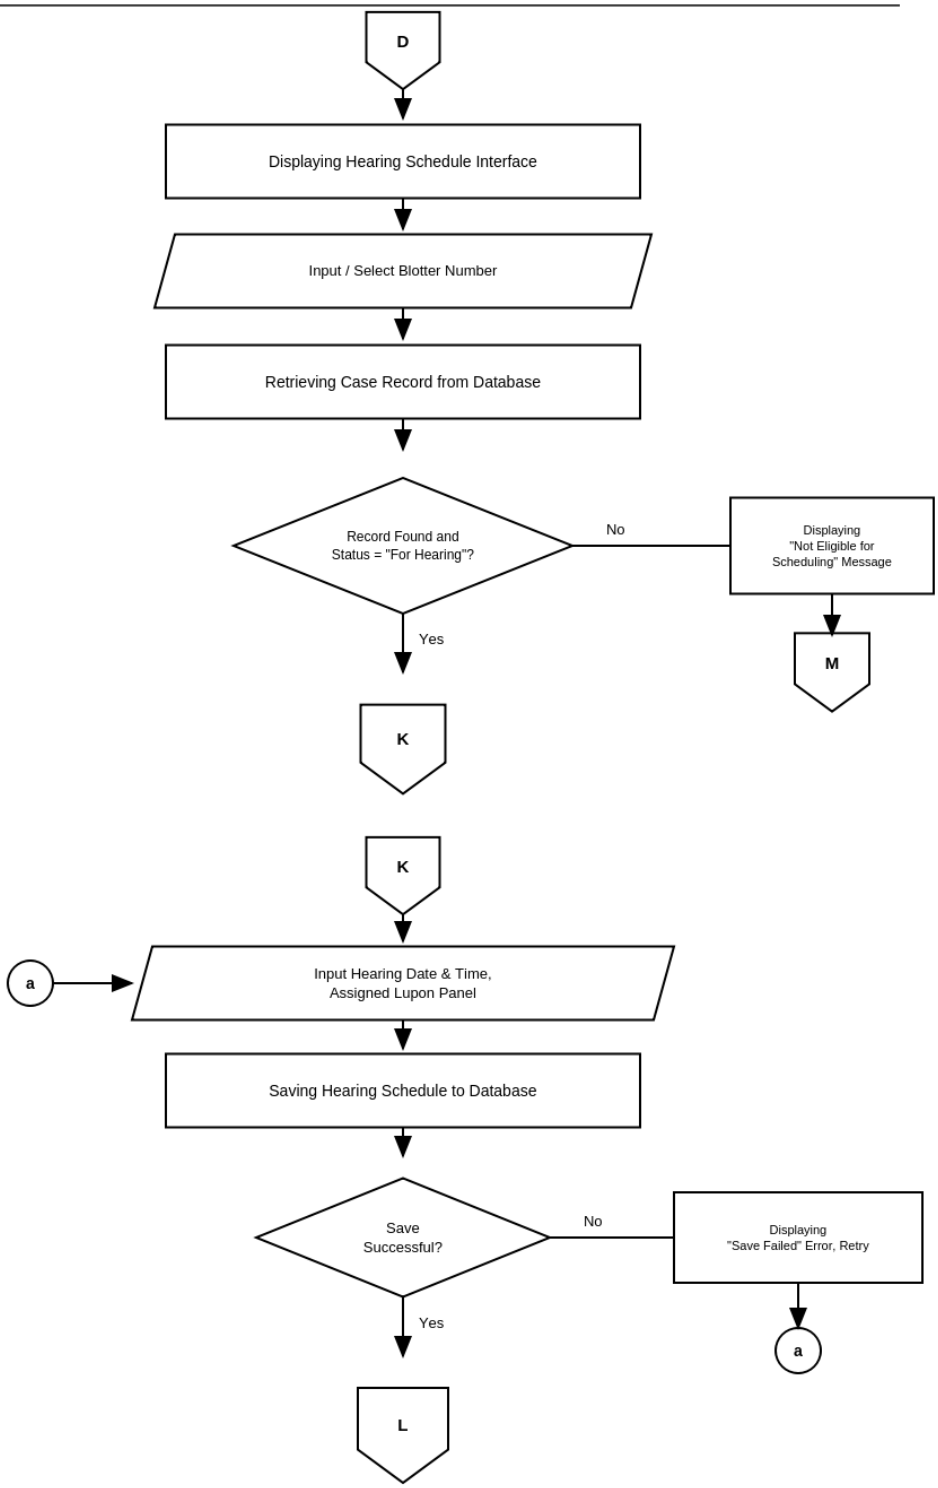

Page 7 — Selecting Record, Updating Status & Saving

Connector C <- from Page 2 (Main Menu, option 3: Status Update) | Connector M -> returns to Page 2 (Main Menu)
On-Page Connector 'a' -> loops back to the Blotter Number input on this same page

Module 4: Hearing / Patawag Schedule

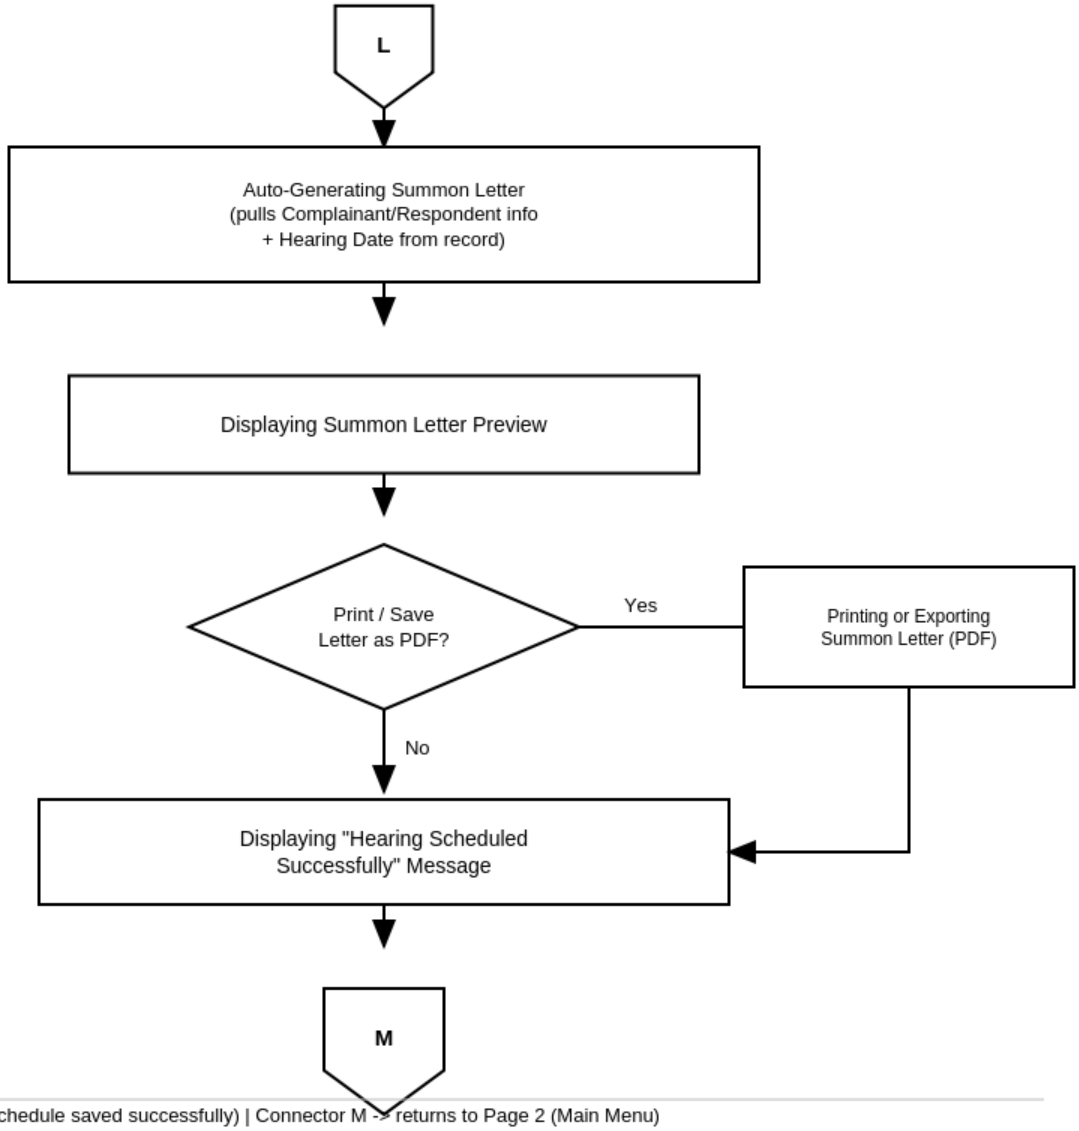

Page 8 — Selecting Case & Setting Hearing Date

Connector D <- from Page 2 (Main Menu, option 4: Hearing / Patawag Schedule)
Connector K -> continues below (Set Hearing Date) | Connector M -> returns to Page 2 (Main Menu)
On-Page Connector 'a' -> loops back to the Hearing Date input on this same page
Connector L -> continues to Page 9 (Auto-Generate Summon Letter)

Module 4: Hearing / Patawag Schedule

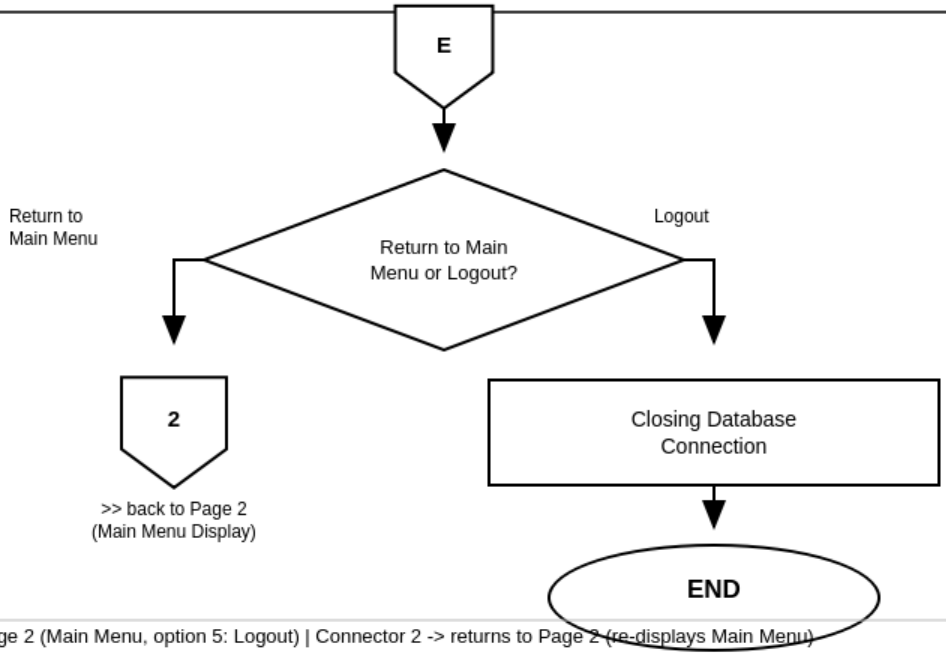

Page 9 — Auto-Generating the Summon Letter

Connector L <- from Page 8 (Schedule saved successfully) | Connector M -> returns to Page 2 (Main Menu)

Barangay Blotter Management System

Page 10a — Logout & Program End

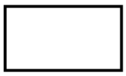

Connector E <- from Page 2 (Main Menu, option 5: Logout) | Connector 2 -> returns to Page 2 (re-displays Main Menu)
Terminating node: all four modules (Blotter Entry, Search Records, Status Update, Hearing Schedule) return control to Page 2 via Connector M before the user ultimately logs out here.

Barangay Blotter Management System

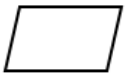

Page 10b — Symbol Legend & Connector Index

Oval
Start / End (Terminal point)

Rectangle
Process (an action/step, written in -ing form)

Parallelogram
Input / Output

Diamond
Decision (always exactly two exits: Yes / No)

Pentagon (Off-Page Connector)
Links flow to ANOTHER page

Circle (On-Page Connector)
Links flow within the SAME page; matching letters (a, b, ...) show where each loop reconnects

Connector Index (where each link goes)

1 Page 1 -> Main Menu display (Login form submitted, success)

2 Page 2 -> re-displays Main Menu (successful login / return from Logout)

A Page 2 -> Page 3 (Main Menu option 1: Blotter Entry)

B Page 2 -> Page 5 (Main Menu option 2: Search & View Records)

C Page 2 -> Page 7 (Main Menu option 3: Status Update)

D Page 2 -> Page 8 (Main Menu option 4: Hearing / Patawag Schedule)

E Page 2 -> Page 10 (Main Menu option 5: Logout)

F Page 3 -> Page 4 (Complainant & Respondent info complete)

I Page 5 -> Page 6 (Search results found)

K Page 8 -> Page 8 (Case eligible for hearing; continues on same page)

L Page 8 -> Page 9 (Hearing schedule saved successfully)

M Pages 4,5,6,7,8,9 -> Page 2 (Return to Main Menu after task)

a / b (on Pages 1,3,5,6,7,8) -> same-page retry / loop-back connectors

End of Flowchart — 10 pages total
